SUMMARY

Business Data Intelligence Analyst with 5+ years of experience in SQL and Snowflake, specializing in extracting, validating, and reconciling large, complex datasets across systems. Experienced at translating business requirements into technical and reporting solutions, documenting complex processes, and communicating insights to both business and technical stakeholders. Experienced with Power BI and ETL scripting, mentoring junior analysts and working independently in multidisciplinary teams. Support stakeholders with forecasting and budgeting. Research and evaluating modern data tooling, such as dbt, Hex, and CoCo, to improve analytics workflows and support platform modernization.

EXPERIENCE

Business Data Analyst (Intelligence & Analytics)– CAA - Alberta Motor Association, Edmonton **May'2022 – present**

- Extract, clean, validate, and reconcile large, complex datasets across systems using Snowflake and SQL, ensuring data quality and adherence to business rules, and present findings through Power BI reports, Hex analysis, and data-storytelling presentations.
- Build and evaluate data models and analytics workflows in dbt, Hex, and Snowflake Cortex Code (CoCo) to modernize reporting and improve the speed, consistency, and maintainability of analytics.
- Prepare forecasting and budgeting analysis for business stakeholders, translating program data into recommendations and cost-efficiency insights.
- Perform data validation to maintain the accuracy and integrity of datasets, improving data Quality and governance
- Conduct data discovery to define key metrics and methods, enabling the business to track strategic growth and performance targets.
- Lead projects including **Alberta's Vehicle Auto Renew Enrolment** and **Member Engagement**. Managed **Hello Alberta** and **Community Membership**, presenting insights and tracking performance through delivery.
- Develop and maintain interactive Power BI dashboards and reports that turn complex datasets into actionable insights for business and technical audiences.
- Serve as **Scrum Master** for the analytics team, facilitating sprint planning, stand-ups, and retrospectives, and managing priorities and deadlines across competing demands.
- Conduct process mapping and requirements gathering, documenting business processes and rules in Confluence, Lucidchart, and Miro, and translating them into technical solutions.
- Collaborate with cross-functional teams and facilitate stakeholder sessions to identify data needs and design data-driven solutions that meet program goals.

Business Intelligence Analyst - Reliance Industries Ltd., India **Jul'2018 – Mar'2020**

- Adept in working in an **Agile development** environment; using Jira to monitor issues & user stories.
- Gathered business requirements, analyzed their business needs & designed **dashboard,** delivering user help manual
- Created basic **ETL** extract, transforming and load to ingest data from various platforms into data lake, automated scripts
- Prepared **SQL scripts** to assess, collected, clean, validate and analyze large datasets using RDBMS, supported data needs
- Generated reporting platform & monitored the sales trend of gas station for 2 months and presented findings to stakeholders about pricing strategies; resulted in **4% sales lift** in idle hours
- Awarded as "**Skill Adder**" for adding new ideas, best practices, knowledge sharing & building exceptional client relationship; appointed to implement **design thinking** strategy in the department
- **Mentored 4 new hires;** supported by equipping them with best technical practice & industry knowledge

PROJECTS

Alberta Driver's Licence and Health Card Merge: Agent Productivity Analysis – AMA **Sep'2026**

- Analyzed agent productivity and transaction handling time following Alberta's rule change merging the driver's license and health card, comparing results against a pre-change baseline productivity.
- Used Snowflake and SQL to extract, validate, and reconcile transaction-level data, defining the metrics and baselines used to track handling time over time.
- Built HEX App that shows handling time, volume, and productivity trends by agent, location, and transaction type, giving business stakeholders ongoing visibility into the impact.
- Presented findings and recommendations to Registries leadership to inform staffing, training, and process decisions.

Technologies: Snowflake, SQL, Hex, Data Validation, Performance Metric

Registries Budgeting and Strategic Planning Platform – AMA **Aug'2026**

- Built a Python and Streamlit application on Snowflake with an automated machine learning model to support budgeting, forecasting, and strategic planning for the Registries business unit.
- Served as the primary point of contact for the Registries business unit, gathering requirements, communicating progress, and translating stakeholder needs into technical features.
- Set up an automated request-handling pipeline using Snowflake Cortex Code (CoCo) and Azure DevOps, reducing manual intake and processing effort.
- Automated data processes and pipelines with the team, documenting data definitions, business rules, and pipeline logic for knowledge continuity.

Technologies: Python, Streamlit, Snowflake, SQL, dbt, Azure DevOps

National Gift Card Program - AMA **Jul'2025**

- Gathered requirements with business teams and prepared planning documents.
- Collaborated with the architecture team to define data flow, integration points, and system design.
- Analyzed data to establish key measures and dimensions, and designed reporting frameworks and performance metrics to support program tracking

Technologies: Snowflake, SQL, Data Modeling, Performance Metrics, Reporting

Hello Alberta Implementation -AMA **Apr'2024**

- Set up touchpoints to capture key data throughout the project
- Data analysis, Data Modeling, Dashboard Design and DAX Measures.

Technology: Snowflake, Statistical Models, Performance Metrics, Reports

EDUCATION

Post-Graduate - Data Analytics for Business **Sep'2020 – Apr'2022**

St. Clair College, Windsor, ON, Canada

- Awarded with **high distinction** & **Faculty Academic Award** (4/4 GPA)
- **Women in STEM Club**; Support fellow undergraduate students in their pursuit of higher education

Bachelor of Technology - Electronics and Communication **2014-2018**

National Institute of Technology, India

- **Ranked 163** in Punjab in National level Engineering entrance examination
- **Prayaas** Club (Volunteer)**-** Taught 50+ under-privileged children

SKILLS

Analytics: Power BI(DAX), Tableau, HEX, Excel
Programming: C#, Python, R
Database: Snowflake, RDBMS, SQL, DB2, Oracle
Delivery Methodologies: Agile, Scrum
Data Management - Data Lifecycle
Design: Figma

Data Platform– Apache Hadoop, Google Analytics
Lucid Charts; Miro Boards – for process mapping
Microsoft Excel - VBA, Office, Access, SharePoint
SWOT & PESTLE Analysis, SDLC & DevOps
AI - Machine Learning, Neural Network
